TABLE OF CONTENTS

Chapter 1	General Introduction	11-26
Chapter 2	Excreted/secreted <i>Trichuris suis</i> products reduce barrier function and suppress inflammatory cytokine production of intestinal epithelial cells. <i>Molecular Immunology 2014</i>	27-36
Chapter 3	Soluble helminth products suppress clinical signs in murine experimental autoimmune encephalomyelitis and differentially modulate human dendritic cell activation. <i>Molecular Immunology 2012</i>	37-48
Chapter 4	<i>Schistosoma mansoni</i> soluble egg antigens induce expression of the negative regulators SOCS1 and SHP1 in human dendritic cells via interaction with the mannose receptor. <i>Manuscript in preparation</i>	49-60
Chapter 5	<i>Trichuris suis</i> -induced modulation of human dendritic cell function is glycan-mediated. <i>International Journal for Parasitology 2012</i>	61-74
Chapter 6	<i>Trichuris suis</i> products modulate TLR4 responses in human dendritic cells via multiple pathways. <i>Manuscript in preparation</i>	75-86
Chapter 7	The helminth <i>Trichuris suis</i> suppresses TLR4-induced inflammatory responses in human macrophages. <i>Genes & Immunity 2014</i>	87-100
Chapter 8	General discussion and summary	101-110
Appendices	Nederlandse Samenvatting	113-117
	Curriculum Vitae	118
	List of Publications	119
	Dankwoord	120-121
